- Size of the Market
- Competitors
- Competitive Advantages
- Traction
- Revenue Model
- Financial Projections
- Current Investors
- Accomplishments to Date
- Use of Funds
- Team
- Contact & Socials

# PROBLEMS & SOLUTIONS

<p>Scams and market volatility pose significant challenges. Although Know Your Customer (KYC) procedures and audits play crucial roles, they may not always suffice in mitigating fraudulent practices.</p>	<p>KYC and audits are crucial but insufficient to prevent fraud. INFI CDEX Exchange offers a unique Liquidity Management system with a 48-hour compensation plan in case of a scam. Their collaboration with cybersecurity firms ensures our platform's maximal security.</p>
<p>The complex operations of WEB3 entail third parties acquiring personal data through digital asset transactions, often accompanied by elevated transaction costs.</p>	<p>We safeguard our users' personal data through our innovative WEB4 concept, the INFI Wallet. This solution transcends traditional wallets; it is a centralized application supported by banks, offering passive income incentives for all users, while maintaining a user-friendly and cost-effective interface.</p>
<p>The market can sometimes exhibit manipulative tendencies, employing unreliable "pay first" marketing tactics and imposing steep startup fees for projects on various Centralized Exchanges.</p>	<p>INFI CDEX Exchange offers fee-free startup costs for projects, providing their community with monthly passive income from Inverted Investment profit. We safeguard traders' investments with our Special Liquidity Management and we are not storing users' digital assets or wallet keys.</p>

The ©SbSe Protocol governs the ecosystem, connecting the digital world with industries like food, real estate, leisure, and pharmaceuticals. The goal is to transform it into a digital WEB4-based payment structure for cost-efficiency, energy savings, waste reduction, and financial incentives.

# OUR BUSINESS MODEL

## SBSE PROTOCOL

OpeWebFour represents the entire Inverted Investment ecosystem and operates under the support of Inverted Investment, a reputable institution founded on INFI Holders, with INFI serving as the primary coin/token within the Inverted Investment framework. Possessing INFI provides a seamless means to acquire a stake in Inverted Investment. Our primary objective revolves around collaborative creation for the community, a commitment underscored by our transparent profit-sharing model. We distribute 60% of profits monthly, with 50% allocated in USDT and 10% in Bitcoin, ensuring visibility and inclusivity for all stakeholders.

Our WEB4 concept integrates the SbSe Protocol within a software application, offering comprehensive multi-blockchain solutions. This innovation empowers users across various proficiency levels in digital finance to generate passive income. The primary objective is to bridge conventional financial systems with blockchain technology and the decentralized domain of cryptocurrencies. Within the realm of cryptocurrencies, our focus lies on mitigating volatility, identifying fraudulent activities, and enhancing user security through distinctive liquidity management strategies and a 48-hour compensation plan.

# OUR COMPETITORS

## Direct Competitors

Thanks to our distinctive ©SbSe Protocol, the Self Builder Smart ecosystem, and the WEB4 concept, we find ourselves in a position without direct competitors. The transition of the ©SbSe Protocol to a WEB4-centered payment framework, facilitated by INFI's bank-integrated wallet, provides users with a one-of-a-kind blend of cost-efficiency, energy conservation, waste reduction, and passive income. This achievement stands as a point of pride in our strategic implementation.

## Indirect Competitors

Centralized and decentralized exchanges

- Binance
- Coinbase
- KuCoin
- Gate io
- Panckakeswap
- Uniswap

# ADVANTAGES

## Competitive Advantage of ©SbSe Protocol

We are focusing to expand our product in everyday life. How we can achieve that? Our primary objective is to transition the ©SbSe Protocol into a digital WEB4-based payment structure. This transformation aims to create a cost-efficient and energy-saving system that minimizes waste and generates financial incentives for both clients and consumers.

## Competitive Advantage of WEB4

The integration of the ©SbSe Protocol into INFI Wallet ensures seamless and secure transactions between various platforms, simplifying the use of cryptocurrencies for all users without storing any personal data from its users.

## Competitive Advantage of INFI Wallet

INFI Wallet, with its banking fundamentals, provides a reliable and trustworthy platform for managing digital assets. The monthly passive income rewards serve as an incentive for users to use the wallet for their transactions and encourage others to do the same

## Competitive Advantage of INFI CDEX Exchange

The INFI CDEX Exchange and Launchpad function as a trading venue for cryptocurrency-focused projects that adhere to the copyrighted ©SbSe Protocol. Our platform emphasizes security, supported by top cyber security firms. Additionally, the INFI CDEX Exchange implements a unique liquidity management approach. To safeguard against fraud, a 48-hour compensation system is in place to protect investors. Notably, user digital devices and wallet keys are safeguarded, ensuring heightened security. Moreover, our platforms are cost-free for new project creators, serving as incubator and offering users passive income opportunities.

# TRACTION

The INFI Wallet operates within the WEB4 framework under the governance of our primary ©SbSe Protocol within the INFI ecosystem. The diagram below illustrates the growth facilitated by the INFI CDEX Exchange and Launchpad, emphasizing the utilization of the INFI Wallet on WEB4.

Binance, the largest cryptocurrency exchange with 170 million users, sets a substantial benchmark. Our ambition is to surpass this milestone within a year through the INFI CDEX Exchange. By 2028, our goal is for the INFI wallet to attract over 1 billion users. Supporting the INFI ecosystem will contribute to the continuous growth of the INFI CDEX Exchange and the INFI ecosystem

CUSTOMERS / MILLION

# REVENUE MODEL

[Back to Agenda Page](#)

Calculations are founded on simple growth. The revenue model does not mirror the monthly growth of the INFI ecosystem.

INFI Wallet WEB4 / calculated with daily 5 million transactions

INFI CDEX Exchange / calculated with daily \$2.5 Million revenue

SbSe PFP - reflects the total profits for Inverted Investment

Inverted Investment monthly profit share for INFI holders in USDT

Inverted Investment monthly profit share for INFI holders in Bitcoin-based on \$65K/BTC price

	INFI Wallet WEB4 / calculated with daily 5 million transactions	INFI CDEX Exchange / calculated with daily \$2.5 Million revenue	SbSe PFP - reflects the total profits for Inverted Investment	Inverted Investment monthly profit share for INFI holders in USDT	Inverted Investment monthly profit share for INFI holders in Bitcoin-based on \$65K/BTC price
Transaction fees	\$1	0.01% / 10 volume accumulated	100%	50%	10%
Daily transactions / Volume	\$5Million	\$2.5 Million	\$7.5 Million		
Monthly total revenue based on 31 calendar days	\$155Million	\$77.5Million	\$232,5Million	\$116.25Million	357,70 BTC
Monthly Expenses, projects development, salary, marketing, growth			\$9.3Million		
Monthly reserves in precious metals / treasury			\$83Million		

# CURRENT INVESTORS

The existing investors consist of team members, family, and friends. Each investor has committed their funds for a 24-month duration as outlined in our terms and conditions.

Currently, a total of \$57,000 has been successfully raised.

## Notes:

- All the funds raised have been used for development purposes, with investors receiving INFI tokens in return.

# ACCOMPLISHMENTS TO DATE

[Back to Agenda Page](#)

## Q4 2023

- INFI Smart Contract
- INFI presale and INFI CDEX deployment
- Testing and audits
- Official INFI presale launch
- Wallet Connect WEB3 implementation

## Q1-Q2 2024

- Deployment, testing, and audits for INFI MultiChain CDEX
- Integration of ©SbSe Protocol
- Development of INFI CDEX Launchpad
- Launch of INFI CDEX and project startups
- Implementation of ©SbSe PFP
- Creation of the concept for INFI Wallet/OpenWebFour
- Rollout of INFI CDEX Launchpad
- Formulation of Marketing Strategy
- Commencement of Project Startups

## Q3 2024

- Collaboration growth with Centralized and Decentralized Exchanges – Expanding INFI CDEX
- Incorporation of ©SbSe Protocol software and INFI CDEX integration into the application
- Launch of INFI on INFI CDEX
- Integration of 200–300 cryptocurrency trading pairs into INFI CDEX
- INFI CDEX Availability on App Store and Play Store for iOS and Android users

## Q4 2024

- Setting up milestones for INFI Blockchain development
- Expanding ©SbSe Protocol Application Integration across different industries
- Preparing for Inverted Investment with 13 unique projects on INFI CDEX, starting with the innovative Wear To Earn NFT Metaverse Game
- OpenWebFour release
- Publishing the 2025 Business Roadmap

# USE OF FUNDS

[Back to Agenda Page](#)

The INFI token's total supply amounts to 2 million tokens, with 1.5 million tokens allocated for sale to generate \$5.9 million. The resulting funds will be distributed as detailed below:

INFI Liquidity \$1,000,000
SbSe Protocol \$1,000,000
WEB4 Development \$1,000,000
Metaverse Project \$150,000
Nexo Integration \$50,000
INFI Treasury \$2,492,000
Marketing, CDEX Upgrade \$300,000
